LEISURE CORP.

CREATING Winning Outcomes

Premium Leisure Corp., through its subsidiary, Pacific Online Systems Corporation (POSC), believes that civic and social development is a shared responsibility. We equally believe, however, that one could always use a head start in life.

With this in mind, we have worked with TESDA and Rotary Club of San Juan Central to organize livelihood trainings for Persons with Disabilities (PWDs). The Housekeeping Training for 20 PWDs at the Center for Excellence in Special Education (Stepping Stone) Foundation, Inc. in May 2016. This was designed to equip the trainees with the competencies required in the hospitality industry such as, preparing guest rooms, handling laundry and providing valet services.

The participants also attended Barista Training with the Rotary Barista Academy last November 2016. This aims to help them acquire skills needed to work in small and medium scale coffee shops, allowing them to earn income to support themselves.

A populace of sound physical and mental health is essential to nation building. This is the guiding insight for our medical and dental mission conducted last December 2016 for the indigent residents of Pasong Tamo, Quezon City. Volunteer medical practitioners rendered services from medical and pediatric consultations to dental check-up, tooth extraction and eye examinations. Medicines and eyeglasses were also given to the beneficiaries for free.

It is our hope that through these services, our beneficiaries' lives will improve. After all, through hard work and with the right skills, anyone can win in life.
